

Session - 16

> nmap -sT ip

for check the port no. & running services

> nmap -sT -p (1111) -sV 192.168.0.9 } ← for detailed explanation of port

> Server

↳ tomcat
↳ 8080

JBoss
↳ 8080

many servers have same port by default but when you need 2 server then you need to change

You can also change the the port no. Port & document without going default conf. file

> cd /etc/httpd/conf
> gedit anubhav.conf

for change port 80 to 81

listen 81

documentroot /var/www

location which you want to set for document

anubhav.conf
